## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Muncy on 11 August 2004.

The application has been amended as follows:

- a. claim 1, line 6, "on the bottom" was deleted;
- b. claim 1, line 8, "a seat dock" was replaced with --the seat dock--;
- c. claim 1, line 9, "has" was replaced with --having--;
- d. claim 1, lines 13-14, "have one end pivotally coupled" was replaced with --each have one end pivotally coupled at a coupling end--;
- e. claim 1, line 15, "a fastening element" was replaced with --a second fastening element--;
- f. claim 1, line 21, "corresponding to" was replaced with --cooperating with--;
- g. claim 1, line 25, "lying" was replaced with --lying angle--;
- h. claim 4, lines 3-4, "retaining element" was replaced with --second retaining element--.

The following is an examiner's statement of reasons for allowance:

U.S. Patent No. 5,957,780 to Grazioli discloses a swing rack that includes a support rack (Fig. 1) with legs (Fig. 1) and a top rail (Fig. 1), two suspension units 7 (Fig. 1) coupled to the top rail, a seat dock (Fig. 1) with a seat rack 2 (Fig. 1) and a backrest rack 3 (Fig. 1) that are each pivotally coupled at a coupling end, a retaining element 6 (Fig. 1), and a stretcher 8 (Fig. 1) bridging the legs wherein the backrest rack is adjustable relative to the seat rack to form a sitting angle and a lying angle.

U.S. Patent No. 6,348,005 B1 to Tseng discloses a swing rack that includes a support rack 1 (Fig. 1) with legs 11 (Fig. 1) and a top rail 12 (Fig. 1), two suspension units 21 (Fig. 1) coupled to the top rail, a frame dock 3 (Fig. 1) with two side frames 330,340 (Fig. 1) and a loading frame 31 (Fig. 1), an anchor dock 44 (Fig. 2) fastened to the load frame by an anchor member (Fig. 2), a seat dock 4 (Fig. 1) with a seat rack 41 (Fig. 1) and a backrest rack 42 (Fig. 1) that are each pivotally coupled at a coupling end 45 (Fig. 2), a bracing bracket 43 (Fig. 1) on the backrest rack, and a first anchor member 35 (Fig. 1) cooperating with the bracing bracket to form a sitting angle wherein the backrest rack is adjustable relative to the seat rack to form a lying angle.

U.S. Patent No. 6,648,768 B1 to Tseng discloses a swing rack that includes a support rack 2 (Fig. 2) with legs 21 (Fig. 2) and a top rail 22 (Fig. 2), two suspension units 233 (Fig. 2) coupled to the top rail, a frame dock 4 (Fig. 2) with two side frames 41 (Fig. 2) and a loading frame 42,43 (Fig. 2), an anchor member 51 (Fig. 3) fastened to the load frame by an anchor member 524,533 (Fig. 3), a seat dock 6 (Fig. 2) with a seat rack 61 (Fig. 2) and a backrest rack 62 (Fig. 2), a retaining element 73 (Fig. 5), and a

Art Unit: 3636

first anchor member 71 (Fig. 5) cooperating with the retaining element wherein the backrest rack is adjustable relative to the seat rack to form a sitting angle and a lying angle.

U.S. Patent No. 6,672,665 B1 to Tseng discloses a swing rack that includes a support rack (Fig. 2) with legs 12 (Fig. 2), two suspension units 21 (Fig. 3), a frame dock (Fig. 3) with two side frames 22 (Fig. 3) and a loading frame (Fig. 3), an anchor member 4 (Fig. 1) fastened to the load frame by an anchor member 41 (Fig. 4), a trough 411 (Fig. 4) in the anchor dock, a seat rack (Fig. 3) with a seat rack 31 (Fig. 3) and a backrest rack 32 (Fig. 3), a coupling end (Fig. 3) connecting the seat rack and the backrest rack through a second fastening element 33 (Fig. 3), a retaining element 53 (Fig. 7), a stretcher 13 (Fig. 4) bridging the legs, and a second anchor member 54 (Fig. 7) coupling with the stretcher wherein the backrest rack is adjustable relative to the seat rack to form a sitting angle and a lying angle.

However, the prior art fails to disclose a swing rack including a seat rack and a backrest rack that each have one end pivotally coupled at a coupling end and fastened thereon through a second fastening element in a coaxial manner, a bracing bracket on a backrest rack that couples with a retaining element, a first anchor member cooperating with the retaining element so that the bracing bracket forms a sitting angle, and a second anchor member coupled to a stretcher bridging legs of a support rack and latching the bracing bracket at a lying angle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
